

Coalition for Eco-Efficient Comminution Medal

Announcing the CEEC Medal

CEEC's vision is to accelerate implementation of eco-efficient comminution strategies through promotion of supporting data and industry benefits.

CEEC's mission and objective is to raise awareness of research findings, alternative comminution strategies and installed outcomes. CEEC aims to accelerate information, knowledge and technology transfer with the objective of achieving lower processing costs and reduced carbon footprint as a result of improved comminution practices.

Purpose of the Ceec Medal

The CEEC Medal will celebrate and recognise the contribution of outstanding research and field work on alternative strategies for Comminution, as stated in CEEC's Mission and Objective.

The Medal will contribute to raising the status of beneficial comminution strategies by:

- Recognising and celebrating individuals or teams who make an outstanding contribution in the field of beneficial comminution strategies.
- Acknowledging individuals or teams who contribute to building global knowledge of beneficial comminution practices by sharing examples of best practice and leadership in comminution and inspiring similar excellence in others.
- Identifying those who build greater awareness and understanding in the wider community of the benefits of knowledge transfer in the area of comminution and energy savings.

Papers and articles submitted for consideration for the CEEC Award need to be innovative; of a standard suitable for technical review, written or published within the past 12 months; ideally demonstrate on-site pilot studies, and display breadth and depth of publication of results and findings within the mining sector and research field.
